

Juniper Networks Helps Organizations Optimize Their Network Operations and Performance

Customers are realizing **significant value** by leveraging Juniper Networks' hardware and software to help optimize their business networks. IDC projects that these benefits generate value in areas such as **network operations, network and application performance, and network cost savings.**

KEY RESULTS

36%
more efficient network
infrastructure management staff

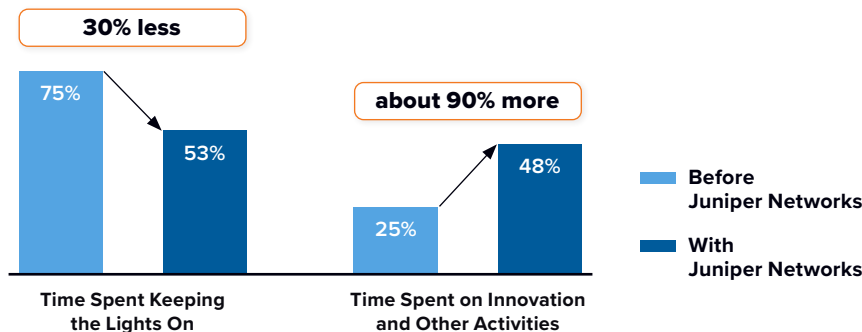

20%
reduced network
infrastructure cost

CUSTOMER QUOTE:

“ This is where Juniper has really helped us: We are no longer spending most of our time fighting fires. We have the time to plan and to architect things. The resiliency and having one common Junos operating system has led us to be fire preventers and long-term planners. ”

Cost and Staff Efficiencies Benefits

IMPACT ON NETWORK TEAM ACTIVITIES

CUSTOMER QUOTE:

“ Juniper removes network constraints to scaling the business, both in terms of integrating acquisitions and increasing sales. ”

75% faster
deployment of ethernet switches
